

# 3x3 - 04 - JJ Custom Works Edition - Outer/Inner Coils - 1 Vol / 1 Tone

0

#### **REVERSE VIEW OF PICKUPS AND SWITCH**

### \* Note: The colour codes assume that the pickup manufacturer leaves their colour coding unchanged from their stock pickup colour coding - The only change being the bridge pickup magnet is a <u>reverse</u> polarity. This schematic is coded for Bare Knuckle pickups showing their North / South Coil polarity. (Alternatively one pickup can be rotated 180 degrees to give the same coil configuration ).

(SHIELD)

NORTH Start wire Black

NORTH Finish wire Green - White SOUTH Finish wire Red SOUTH Start wire

BRIDGE Green - White

Grd To Bridge-

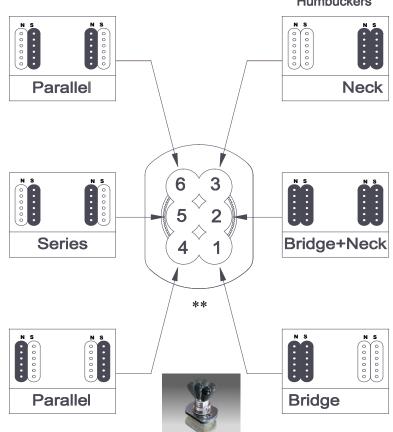

Vol Tone 2028 () -04 (Sleeve)

Tin the solder pads prior to soldering the wires. Solder all ground wires onto pads marked 'GD'. The metal casing is stainless steel and can not be soldered.

Avoid prolonged/excessive heating of pads.
